---

To whom it may concern,

I am the Director and owner of a CAM Northcliff Dealership in Johannesburg. We run a vehicle showroom, workshop and a car wash for our customers whom we sell and repair vehicles for.

We tried different products for our dealership for cleaning our showroom and workshop floors, until one day a representative of GP2 visited my dealership with GP2 degreaser. I am very proud to state that there is no other magic product in the motor industry like GP2, it's good for the floors, removes sticky oil and grease on the workshop floor, removes rust on the vehicles and workshop components. When you visit my workshop you will believe you are walking into a bank – that is how clean my workshop floor is.

We wash dirty mags, engines, stripped gearboxes and diffs with sticky grease and oil and leave every component spotlessly clean.

The product is safe to use with bare hands and is not harmful. My mechanics cannot get enough of the product as it makes their lives so much easier. In the past we used dangerous solvent based products to clean. GP2 is safe to use and surpasses any other product I have ever used.

I would recommend this product to anyone in the motor industry, especially for showrooms, workshops and your car wash.

Regards

Jabu Ncube  
Director  
CAM Northcliff
